Video & Gallery: Students stay up to 2am to work on chassis build

THE University of Hertfordshire Formula Student team are currently working on the rear end of the chassis. They have to create wooden sections to perform as jigs. These then hold all the metal tubes in the right place, which helps build the frame of the car.

But with the Easter break fast approaching, the team are working flat out to get as much work done before they all finish for Easter.

Darren Wells said:

'Work has increased dramatically this week, what with Easter being just around the corner. In fact a few of us stayed until 2am last night (Thursday), to pack as many hours into the chassis build as possible'.

Despite their hectic schedule, the Formula Student team have been able to provide the WHT with pictures and video of this process.
