

Live Redesign of Your Formula Student Car

Autodesk® Alias® Automotive software is an industry-leading solution for automotive design and styling and the choice of leading automotive studios throughout the world. Alias® provides a comprehensive set of visualization and analysis tools for the entire shape-definition process; from concept sketching and modeling up to Class-A surfacing.

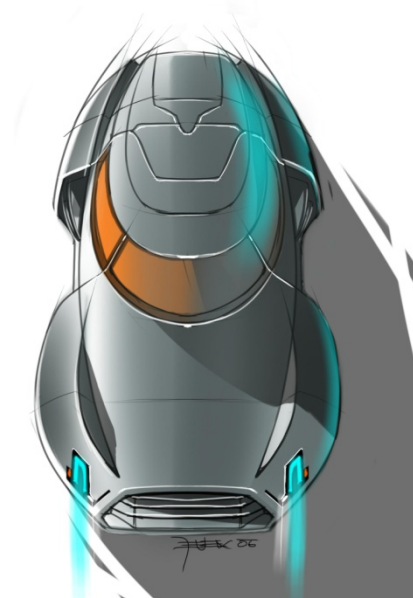

One of Autodesk's best Alias designers offers your team an opportunity for an innovative and spectacular redesign of the body shell of your Formula Student Car "live on the big screen"

Simply register as soon as possible and bring the relevant data* of your car in one of the standard file formats** on a memory stick or DVD to our booth and you will see how it your car could look like. You will also receive a color printout of your redesign that you can take home with you.

Bookings for each day listed below will be taken after 9:00 at the Autodesk booth as long as they are available, on a "first come, first serve" basis.

Timetable:

Thursday 16 th	10:00	14:00	16:00
Friday 17 th	10:00	14:00	16:00
Saturday 18 th	10:00	14:00	16:00

* Relevant data: Frame, wheels, seats, etc. - what is necessary to define the outer body shell

** Supported file formats: Autodesk Inventor, SolidWorks, Pro/E, Catia V5, Catia V4, UGS NX, IGES, STEP, VDA
